

Steven Macchia

Trust & Safety and Compliance Leader | AI-Assisted Moderation | Child Safety | Regulatory Compliance

Raleigh, NC | hello@stevenmacchia.com | [linkedin.com/in/stevenmacchia](https://www.linkedin.com/in/stevenmacchia) | [stevenmacchia.com](https://www.stevenmacchia.com)

PROFESSIONAL SUMMARY

Trust and Safety (T&S) and Compliance leader with 10+ years in Trust & Safety and online communities. Built a gaming UGC platform's Trust & Safety function from zero and rose through three promotions to lead global compliance and Trust & Safety. Partners with Product, Engineering, Legal, and Operations to turn safety and regulatory requirements into working systems. Experienced in AI-assisted moderation with human review, child safety and CSAM response, law enforcement response, privacy and regulatory compliance (GDPR, CCPA, DSA), and building LLM-powered safety tools.

KEY ACHIEVEMENTS

- **Built the Trust & Safety function from zero** at a gaming UGC platform: Community Standards, enforcement playbooks, escalations, and the team.
- **Led global privacy and regulatory compliance** across GDPR, CCPA, and the DSA, including AI and technology vendor governance.
- **Oversaw moderation of billions of items a month** across multiple AI vendors and human review, and managed the vendor budget.
- **Managed 3 team managers, each leading about 30 people**, and distributed policy guidance to a site of 300+ moderators.
- **Established the company's NCMEC partnership**, strengthening child-safety reporting, response, and investigations.
- **\$1M+ projected annual savings** from a zero-to-one, platform-wide user reputation system.
- **Built T&S Workbench**, 10 free Trust & Safety tools including LLM-powered policy, notice, and appeal assistants.

Compliance & Privacy: GDPR, CCPA, Digital Services Act (DSA), Privacy Governance, Data Protection Impact Assessments (DPIA), ROPA, DSAR, Data Processing Agreements (DPA), Data Retention, Sanctions Research, Regulatory Risk Assessment, Vendor Risk Management

AI & Automation: AI-Assisted Moderation, Human-in-the-Loop Review, Automated Detection Evaluation, Moderation Vendor Evaluation, LLM Tooling and Prompt Design, AI Vendor Governance, AI Risk Mitigation

Tools: Hive, OCR, Deepgram, Claude (LLM), SQL (MySQL), Zendesk, GitHub

PROFESSIONAL EXPERIENCE

Head of Global Compliance and Trust & Safety

Medal.tv | Sep 2024 – Present

- Lead global Trust & Safety and compliance for a gaming UGC platform moderating billions of videos, images, and text submissions each month with AI-assisted scanning (OCR, Hive, audio transcription), reputation scoring, and appeals.
- Direct global privacy and regulatory compliance across GDPR, CCPA, and the EU Digital Services Act (DSA): DPIAs, ROPA, DSARs, data retention, sanctions research, and vendor oversight.
- Translate policy and compliance requirements into product specifications and success metrics with Engineering, Product, Data, Legal, and Operations.
- Manage CSAM escalations, investigations, preservation requests, and law enforcement inquiries with NCMEC, legal counsel, and authorities.

- Evaluate the performance and limitations of automated moderation, balancing AI detection with human review to improve detection accuracy, reviewer efficiency, and user outcomes.
- Manage the Trust & Safety vendor budget and relationships across multiple AI moderation vendors (OCR, image, video, and audio scanning) and Deepgram transcription, including contracts, DPAs, and data-processing reviews.

Safety Manager

Medal.tv | Jan 2024 – Sep 2024

- Led the zero-to-one build of a platform-wide user reputation system, projected to save \$1M+ annually while improving moderation efficiency and enforcement accuracy.
- Led the migration of AI-assisted moderation and scanning for visual and text content across a short-form video platform.
- Defined safety use cases, escalation logic, and success metrics for automated moderation; combined signals across safety systems and user data to surface harmful behavior and moderation gaps.

Program Manager, Trust & Safety

Medal.tv | Jan 2022 – Jan 2024

- Built and scaled foundational Trust & Safety programs for a global gaming UGC platform handling millions of items daily.
- Established Medal's NCMEC partnership and designed escalation and operational workflows for child safety, severe abuse, illegal content, and other high-risk issues.
- Introduced AI-assisted detection with human oversight for nuanced and high-risk cases; evaluated vendors on detection coverage, efficiency, and user safety.
- Built partnerships with Trust & Safety organizations across gaming and technology.

Program Manager, Community Operations

Medal.tv | Apr 2020 – Mar 2022

- Founded Medal's first Community, Social Media, and Trust & Safety functions and built its first T&S team.
- Wrote Medal's Community Standards, enforcement procedures, and operational playbooks from scratch.

Trust & Safety Team Lead

Cognizant | Nov 2017 – Apr 2020

- Managed three team managers, each leading about 30 content moderation and community operations staff; distributed urgent policy guidance to a site of 300+ moderators.
- Built training on sensitive and emerging safety issues; ranked top 3 of 500 employees and was promoted to Supervisor in November 2018.

Community Manager and Technical Support Representative

Survival Servers | Jan 2016 – Jul 2017

- Grew a gaming community and supported thousands of customers via Zendesk; administered MySQL databases.

PROJECTS AND WRITING

Creator, T&S Workbench

stevenmacchia.com | 2026

- Designed and launched 10 free Trust & Safety tools: abuse pre-mortem (58 risks, 104 safeguards, 33 legal obligations), incident tabletop (37 scenarios), metrics framework (36 metrics with SQL), vendor scorecard, maturity model mapped to DTSP and Ofcom codes, and a DSA transparency report builder.
- Built LLM-powered assistants (Claude) for policy stress-testing, enforcement notices, and appeal review, with a person approving every decision; built end to end with AI-assisted development and published across 8 GitHub repositories.

Trust & Safety Writing

LinkedIn | 2026

- Regular analysis on T&S measurement, appeals as a quality signal, child safety, and governing automated enforcement.

EDUCATION

Bachelor of Arts (B.A.), Humanitarian Intervention

The New School | New York, NY | 2017
